

Does your patient have a **FOOT AND ANKLE** problem?

Footmotion
Forefoot

Initial S™ Foot
First single use instruments kit

This panel displays various surgical instruments for foot and ankle procedures. At the top, several long, thin instruments with different colored handles (purple, yellow, blue) are shown. Below them, a hand model is shown with a purple instrument inserted into the foot. In the center, a hand model is shown with a blue instrument inserted into the foot. At the bottom, a clear plastic instrument kit is shown next to its white box, which features the 'Initial S' logo.

Footmotion
Plating Systems

Flatfoot

Lapidus

This panel shows various plating systems and implants. At the top, several long, thin plates with different colored handles (yellow, blue, green) are shown. Below them, a hand model is shown with a green plate inserted into the foot. In the center, a hand model is shown with a blue plate inserted into the foot. At the bottom, a hand model is shown with a green plate inserted into the foot. The 'Flatfoot' and 'Lapidus' labels are positioned next to their respective implant images.

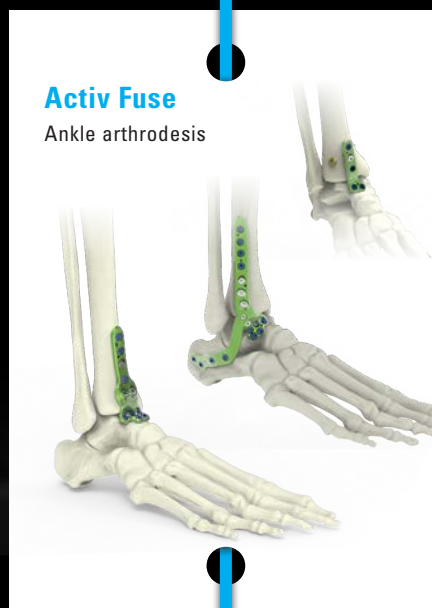

Initial A
Single use distal fibula sterile kits

This panel shows the Initial A single use distal fibula sterile kits. A hand model is shown with a green plate inserted into the distal fibula. Next to it is a clear plastic instrument kit and its white box, which features the 'Initial A' logo.

Initial F
First single use MTP1 kit

This panel shows the Initial F first single use MTP1 kit. A hand model is shown with a green plate inserted into the first metatarsophalangeal joint. Next to it is a clear plastic instrument kit and its white box, which features the 'Initial F' logo.

Activ Fuse
Ankle arthrodesis

This panel shows the Activ Fuse ankle arthrodesis system. A hand model is shown with a green plate inserted into the ankle joint. Next to it is a clear plastic instrument kit and its white box, which features the 'Activ Fuse' logo.

TrueLok™
Ring Fixation System

This panel shows the TrueLok Ring Fixation System. A hand model is shown with a large, circular metal ring fixation system around the ankle joint. The system is composed of several metal rings and plates, which are used to stabilize the ankle joint during surgery.
